<ul style="list-style-type: none">• Software development and unit testing in association with defined test cases• Produce technical specifications or technical documentation as directed• Contributing within the overall development team, suggesting ways that we might be able to improve overall effectiveness, quality etc.

DESIRED SKILLS SUMMARY

Candidates must have relevant practical .net development experience in a commercial environment coupled with C# programming (or VB.net) expertise. You should also be familiar with a number of the following:-

- Web Development & associated presentation standards
- XML & Web services
- Use of XSL style sheets
- HTML or XHTML
- PL/SQL or T-SQL
- Database administration (e.g. SQL Server)
- Administration of Windows XP / Windows Vista
- Experience with the Aptify development platform a plus, but not required
- Microsoft Certification(s) (MCP) or equivalent training a plus
- Working knowledge of Microsoft Silverlight a plus
- Knowledge of publishing processes or similar vertical industry, and finance systems and processes a plus

SPECIAL TASKS

Travel to publishing customer and other locations (primarily in North America) as dictated by business requirements.

FLEXIBILITY STATEMENT

The fast moving nature of the company's business also means that you may, from time to time, be asked to perform roles outside your original job description. This allows the company to utilise its people in the best possible way at all times and to help employees make their contribution to a changing environment.

INTERNAL RELATIONSHIPS

Reports to Development Team Leader.

EXTERNAL CONTACTS

All activities involve direct interaction with publishing customer personnel at times, to understand requirements and add value to the software development, delivery, and support process. As such, strong communication skills are vital.

Interested applicants should send their CV or resume to recruitment@publishingtechnology.com quoting the above job reference.
